## PROFILE

I am a qualified software engineer with one year of professional experience in the software industry. My main specialization is .NET and ASP.NET. I have worked with the full cycle of application development, from gathering requirements and designing relational and non-relational databases to deploying applications in cloud solutions such as AWS, followed by monitoring and support. In addition, I have solid experience in working with microservices and event-driven architectures. I am an open and sociable person and ready to participate in team software development processes.

## SOFT SKILLS

- Control over application of general principles of high quality software development (DRY, KISS, SOLID)
- Agile (Jira/Confluence/BitBucket)
- Participation in all stages of SDLC as a part of the team
- Computer science/literacy
- Teamwork
- Time-management

## HARD SKILLS

- ASP.NET Core/.NET Core/Entity Framework Core
- MediatR/FluentValidation/AutoMapper/Refit
- JWT Auth
- NUnit
- AWS (Amazon S3, IAM)
- RabbitMQ/Hangfire/SignalR/Firebase/Elasticsearch
- Docker (Portainer)
- CI/CD (GitLab, BitBucket)
- DBMS (MSSQL, PostgreSQL)
- Angular (Basic), React (Basic)

## EDUCATION

### COLLEGE OF BUSINESS AND LOW

Secondary Special Education,  
Information technology software  
2020 - 2024

### BELARUSIAN STATE UNIVERSITY OF INFORMATICS AND RADIOELECTRONICS

Bachelor of Engineering - BE,  
Software Engineering  
2024 - 2028

## EXPERIENCE

### .NET SOFTWARE ENGINEER

Solid Expert

July 2023 - June 2024

- Working in a managed team using Agile methodology
- Creating, maintaining and configuring services, writing NUnit tests
- CRM system development
- Working with the cloud (Amazon S3, IAM)
- Database design and administration
- CI/CD (BitBucket)
- Developed a cloud-based file synchronization application with microservices on the .NET MAUI platform. As well as small applications like XML editor

# EXPERIENCE

## TRAINEE SOFTWARE ENGINEER

Renaissance Hotels

November 2023 - April 2024

Completion of industrial-technological and pre-diploma practice.

Developed a software tool to automate the work of a hotel administrator.

Automated the following processes:

- Keep records of reservations, guests, rooms and employees, as well as provide additional services to hotel guests;
- Hotel management and operation (including effective inventory management, resources, flexibility in staff work schedules and accounting of financial flows);
- Infrastructure management, such as buildings, equipment, communications, maintenance and cleaning;
- Creating reports on hotel occupancy, average booking cost, profitability for different periods and other key indicators;
- Implementation of an analytics system for demand forecasting and rate optimization based on data analysis;
- Creation of a module for managing guest feedback, including processing reviews, suggestions and complaints;
- Developing a loyalty system for regular customers, including accrual of bonuses and provision of special offers.
